3. Whenever a Solicitor charges for any work of the kind classified in Order 1 an amount greater than normal costs he shall file a bill of costs with the Registrar of the Supreme Court giving the name and address of his client and full particulars of the work done, and the charges made, and shall give the person from whom payment of the bill is claimed notice that he is entitled to have the same taxed by the Registrar: Provided that no such bill shall be required to be filed in cases in which only normal costs and the additional amount mentioned in Order 2 are properly claimed.

4. When normal costs only are charged it shall not be obligatory upon the solicitor to render a detailed bill of costs: save as aforesaid, and in the absence of any agreement such as is mentioned in Order 9, any client against whom costs are charged may either before payment or within one week after payment, claim to have a detailed bill of costs rendered to him and may claim to have such bill taxed by the Registrar.

IMPORTS AND EXPORTS, FOR THE YEAR 1936.

PREFATORY NOTE.

ALL TABLES relate to the Calendar Year.

The "**Imports for Home Consumption**" include goods entered for use in the Colony at the time of importation, and goods cleared for home use ex warehouse.

The imports statistics do not include:—

- (1) Personal luggage, unless including parcels of dutiable goods, which are included in the statistics.
- (2) Ship's stores, Military and Naval stores on board Government Vessels, bunker coal and ballast of no commercial value.

Countries to which Imports and Exports are credited.—Imports are credited to the country of origin as far as can be ascertained. When not stated on the documents and the country of origin is doubtful the country whence consigned is credited.

Exports are credited to the country of ultimate destination as declared by the exporters.

Method of ascertaining quantities and values of Imports and Exports.—The statements of quantities and values are based on the declarations of importers and exporters as subsequently checked by the Customs Officials. Where goods are entered by weight, the quantities shown as imported and exported represent the net weight exclusive of packages, sacks, casks, &c., in which they may be contained.

The values of imports are exclusive of the amount of duty and are "**c.i.f.**;" the values of exports are exclusive of export duty and are "**f.o.b.**"

Unenumerated Goods. Parcel Post and Bullion and Specie.—Unenumerated goods are divided into "Unmanufactured" and "Manufactured," and are placed in the Tables of Imports and Exports after all other goods recorded alphabetically, under class II and class III respectively.

Imports by Parcel Post are not classified according to their nature but are separately recorded at the end of the Table of Imports, and are entered according to value.

There are no public piers. A local firm owns a timber pier with frontage of 200 feet and depth from 15 to 21 ft.</p>
<p>5. What are the respective lengths of piers, wharves or (in the case of enclosed docks) dock quays, where the maximum depth of water, referred to in Question 4, exists?</p> <p>What percentage does the total of these lengths bear to the total accommodation at the port?</p>	<p>No wharves capable of berthing ocean-going steamers exist.</p>
<p>6. What are the dimensions (length, loaded draught and beam at that draught) of the largest vessels which under existing circumstances, can be—</p> <p>(a) berthed alongside any pier or wharf (L.W.O.S.T.)?</p> <p>(b) in the case of enclosed docks—</p> <p>(1) admitted direct to?</p> <p>or</p> <p>(2) admitted through the entrance lock of any important dock or docks, H.W.O.N.T.?</p> <p>7. 3. Whenever a Solicitor charges for any work of the kind classified in Order 1 an amount greater than normal costs he shall file a bill of costs with the Registrar of the Supreme Court giving the name and address of his client and full particulars of the work done, and the charges made, and shall give the person from whom payment of the bill is claimed notice that he is entitled to have the same taxed by the Registrar: Provided that no such bill shall be required to be filed in cases in which only normal costs and the additional amount mentioned in Order 2 are properly claimed.

4. When normal costs only are charged it shall not be obligatory upon the solicitor to render a detailed bill of costs: save as aforesaid, as in the absence of any agreement such as is mentioned in Order 9, any client against whom costs are charged may either before payment or within one week after payment, claim to have a detailed bill of costs rendered to him and may claim to have such bill taxed by the Registrar.

(4) The agreement may be sued and recovered on or impeached and set aside in the like manner and on the like grounds as an agreement not relating to a Solicitor; and if, under any order for taxation of costs the agreement, being relied upon by the Solicitor, shall be objected to as unfair, or unreasonable, the Registrar may enquire into the facts and certify the same to the Chief Justice; and if upon such certificate it shall appear to the Chief Justice that just cause has been shown either for cancelling the agreement or for reducing the amount payable under the same, the Chief Justice shall have power to order its cancellation or reduction, and to give all such directions necessary or proper for the purpose of carrying his order into effect or otherwise consequential thereon, as to the Chief Justice may seem fit.

10. Any Solicitor, to whom either alone or jointly with another person a mortgage is made, shall be entitled to receive and recover from the mortgagor, for all business transacted and acts done by the Solicitor or by the firm to which he belongs, all such usual professional charges and remuneration as he and the firm aforesaid, would have been entitled to receive if the mortgage had been made to a third person, and the third party had retained the Solicitor or firm to transact the business and to do the acts. In this order the expression "mortgage" includes a transfer of mortgage, and any charge on any property, for securing money or money's worth.

IMPORTS AND EXPORTS,

FOR THE YEAR

1937.

PREFATORY NOTE.

ALL TABLES relate to the Calendar Year.

The "**Imports for Home Consumption**" include goods entered for use in the Colony at the time of importation, and goods cleared for home use ex warehouse.

The imports statistics do not include:—

- (1) Personal luggage, unless including parcels of dutiable goods, which are included in the statistics.
- (2) Ship's stores, Military and Naval stores on board Government Vessels, bunker coal and ballast of no commercial value.

Countries to which Imports and Exports are credited.—Imports are credited to the country of origin as far as can be ascertained. When not stated on the documents and the country of origin is doubtful the country whence consigned is credited.

Exports are credited to the country of ultimate destination as declared by the exporters.

Method of ascertaining quantities and values of Imports and Exports.—The statements of quantities and values are based on the declarations of importers and exporters as subsequently checked by the Customs Officials. Where goods are entered by weight, the quantities shown as imported and exported represent the net weight exclusive of packages, sacks, casks, &c., in which they may be contained.

The values of imports are exclusive of the amount of duty and are "**c.i.f.**;" the values of exports are exclusive of export duty and are "**f.o.b.**"

Unenumerated Goods, Parcel Post and Bullion and Specie.—Unenumerated goods are divided into "Unmanufactured" and "Manufactured," and are placed in the Tables of Imports and Exports after all other goods recorded alphabetically, under class II and class III respectively.

Imports by Parcel Post are not classified according to their nature but are separately recorded at the end of the Table of Imports, and are entered according to value.

QUESTIONS.

ANSWERS.

I. *If the prison is on a separate system, is the separation complete? And if not, what is the separation enforced by day and night respectively?*

The Male Prison is constructed on the separate system and each prisoner has a cell to himself, but communication can be obtained through the ventilating grates at the back of the cells; a vigilant patrol is enforced every half hour during the night. Communication is thus easily detected and punished accordingly.

The Female Prison is on the separate system as far as practicable. There is usually sufficient accommodation for complete separation.

II. *If not on the separate system, what provision is there for the supervision of the prisoners while in association?*

The males are supervised by Warders, and the females by a Matron and Assistant.

III. *How many cells are there; and how many associated wards?*

MALE PRISON.

There are 76 ordinary cells, 2 condemned cells, and a hospital with room for 6 beds in it (with a surgery and a sleeping room for an officer.)

FEMALE PRISON.

There are 6 ordinary cells, 2 association cells, and an infirmary with room for 3 beds.

MALE PRISON.

IV. *Taking the average number of prisoners in gaol, how many cubic feet of space are there for each prisoner during the hours of sleep?*

The 76 cells each allow 797 cubic feet, the hospital when full allows 800 cubic feet per patient.

And what superficial area?

63 Square feet (Superficial area) surrounded by an enclosed verandah 10 feet wide.

FEMALE PRISON.

The 6 cells each allow 600 cubic feet. The 2 association cells each allow 1,260 cubic feet, the infirmary when full allows for 600 cubic feet per patient.

Single cells 58 square feet.

Association cells 124 square feet. (Superficial area) with a corridor 10 feet wide.

V. *How are the prisoners classified?*

Males and Females, in two classes as follows:—

1. Convicted criminal prisoners.

2. Prisoners committed on remand, for trial, for want of sureties, or for safe custody, and non-criminal debtors.

Convicted criminal prisoners are divided into 4 classes for diet, and 3 for labour, according to their sentences and earnings by marks.

VI. *Is penal labour—that is, labour by treadmill, crank, or shot drill—in force?*

No.

VII. *If so, during what periods of imprisonment, in respect of what classes of prisoners, and during how many hours, is such penal labour enforced? In stating hours of tread-wheel labour, give, first, the total time on and off at the wheel, &c.; secondly, the length of spells and intervals of rest.*

There is no labour by treadmill or shot drill in force.

VIII. *What kind of labour, other than penal labour, is in use?*

Males. Baking Bread for the institutions, cooking Prison food, making Prison officer's uniforms, clothing and bedding for public institutions, carpenter's, mason's, painter's, tin-smith's and shoemaker's work, breaking stones, preparing cocoa, &c., all within the prison walls.*

Females. Breaking stones, washing clothing and bedding, sewing, picking fibre also making Female clothing, sheets, headkerchief, &c., for other institutions as well as repairs to all clothing and cleaning work generally.†

<p>1. At bar or entrance what is :—</p> <p>(1) the minimum width?</p> <p>(2) the minimum navigable depth. L.W.O.S.T.?</p> <p>(Note.—If between the entrance and the deep sea there are bars or shoals where a lesser depth occurs than the minimum indicated above, a list of such observations and of the depths over them (L.W.O.S.T.) should be given).</p>	<p>(1) 500 ft. width giving depth varying from 30 to 72 ft.</p> <p>A channel of 30 ft. min. depth is available marked by buoys.</p>
<p>2. In the approach channel from bar or entrance to berthing accommodation, what is :—</p> <p>(1) the minimum and maximum width?</p> <p>(2) the minimum and maximum depth, L.W.O.S.T.?</p>

There are no public piers. A local firm owns a timber pier with frontage of 200 feet and depth from 15 to 21 ft.</p>
<p>5. What are the respective lengths of piers, wharves or (in the case of enclosed docks) dock quays, where the maximum depth of water, referred to in Question 4, exists?</p> <p>What percentage does the total of these lengths bear to the total accommodation at the port?</p>	<p>No wharves capable of berthing ocean-going steamers exist.</p> <p>A pier 850 ft. long to berth two steamers each 400 ft. long with a draught not exceeding 30 ft. is now under construction.</p>

**IMPORTS AND EXPORTS,
FOR THE YEAR
1938.**

PREFATORY NOTE.

ALL TABLES relate to the Calendar Year.

The "**Imports for Home Consumption**" include goods entered for use in the Colony at the time of importation, and goods cleared for home use ex warehouse.

The imports statistics do not include:—

- (1) Personal luggage, unless including parcels of dutiable goods, which are included in the statistics.
- (2) Ship's stores, Military and Naval stores on board Government Vessels, bunker coal and ballast of no commercial value.

Countries to which Imports and Exports are credited.—Imports are credited to the country of origin as far as can be ascertained. When not stated on the documents and the country of origin is doubtful the country whence consigned is credited.

Exports are credited to the country of ultimate destination as declared by the exporters.

Method of ascertaining quantities and values of Imports and Exports.—The statements of quantities and values are based on the declarations of importers and exporters as subsequently checked by the Customs Officials. Where goods are entered by weight, the quantities shown as imported and exported represent the net weight exclusive of packages, sacks, casks, &c., in which they may be contained.

The values of imports are exclusive of the amount of duty and are "**c.i.f.**;" the values of exports are exclusive of export duty and are "**f.o.b.**"

Unenumerated Goods. Parcel Post and Bullion and Specie.—Unenumerated goods are divided into "Unmanufactured" and "Manufactured," and are placed in the Tables of Imports and Exports after all other goods recorded alphabetically, under class II and class III respectively.

Imports by Parcel Post are not classified according to their nature but are separately recorded at the end of the Table of Imports, and are entered according to value.

<p>1. At bar or entrance what is :—</p> <p>(1) the minimum width?</p> <p>(2) the minimum navigable depth. L.W.O.S.T.?</p> <p>(Note.—If between the entrance and the deep sea there are bars or shoals where a lesser depth occurs than the minimum indicated above, a list of such observations and of the depths over them (L.W.O.S.T.) should be given).</p>	<p>(1) 500 ft. width giving depth varying from 30 to 72 ft.</p> <p>A channel of 30 ft. min. depth is available marked by buoys.</p>
<p>2. In the approach channel from bar or entrance to berthing accommodation, what is :—</p> <p>(1) the minimum and maximum width?</p> <p>(2) the minimum and maximum depth, L.W.O.S.T.?</p>	
<p>3. What is—</p> <p>(1) the rise and fall of tides</p> <p>(a) ordinary springs,</p> <p>(b) ordinary neaps?</p> <p>(2) the rise of ordinary neaps above L.W.O.S.T.?</p>	<p>(a) 1 ft. 6 ins.</p> <p>(b) 8 ins.</p>

There are no public piers. A local firm owns a timber pier with frontage of 200 feet and depth from 15 to 21 ft.</p>
<p>5. What are the respective lengths of piers, wharves or (in the case of enclosed docks) dock quays, where the maximum depth of water, referred to in Question 4, exists?</p> <p>What percentage does the total of these lengths bear to the total accommodation at the port?</p>	<p>No wharves capable of berthing ocean-going steamers exist.</p> <p>A pier 850 ft. long to berth two steamers each 400 ft. long with a draught not exceeding 30 ft. is now under construction.</p>
<p>6. What are the dimensions (length, loaded draught and beam at that draught) of the largest vessels which under existing circumstances, can be—</p> <p>(a) berthed alongside any pier or wharf (L.W.O.S.T.)?</p> <p>(b) in the case of enclosed docks—</p> <p>(1) admitted direct to?</p> <p>or</p> <p>(2) admitted through the entrance lock of any important dock or docks, H.W.O.N.T.?</p>	<p>See 4 and 5.</p>
<p>7. What are the dimensions (length, breadth and depth over sill H.W.O.N.T.) of the largest dry dock or floating dock in the port?</p>	
<p>8. Are operations in progress to increase the depth of water—</p> <p>(a) at the entrance and in the approach channel—</p> <p>(b) in the case of enclosed docks, at the entrance lock, if any, of any important dock or docks—</p> <p>(c) at the principal berths—</p> <p>to 40 feet at L.W.O.S.T. (in the case of the berths at enclosed docks, H.W.O.N.T.) and is accommodation being provided for vessels 1,000 feet in length and of 100 feet beam?</p> <p>If not, to what extent is deepening being effected, and for vessels of what dimensions (length, draught, and beam at that draught) is accommodation being provided or in contemplation?</p>	<p>No operations in progress.</p>
